

ABOUT ME

I'm a husband, drummer, and developer. I've spent years teaching music to students with a variety of ages and backgrounds, traveled the world playing drums, and recently found a passion for software development. I'm hungry to learn, humble and a team player.

TECHNOLOGY

Front End - HTML5, JavaScript, JQuery, Grunt, Git / Github, CSS3 / Sass, AngularJS, Bootstrap, Materialize
Back End - C#, .NET, Firebase, SQL

EDUCATION

MM Music and Human Learning
University of Texas-Austin

BM Percussion Performance
University of Nebraska-Omaha

namespace AdamReidelbach

public class Experience

Apprentice Software Developer

Nashville Software School

April 2017 - Present

- Intensive full-time software development bootcamp. Final three months being executed in a simulated company environment with Agile methodology.
- Focused on fundamentals of object oriented programming through individual and group projects.
- Created single page applications using JavaScript, jQuery, and AngularJS with HTML, CSS, Bootstrap and Materialize.
- Utilized Grunt for task-running: Browserify, JSHint, Sass, etc.
- Project management/tracking with Trello & GitHub Issue Tracking.
- Solution Design: white-boarding, wireframes, and ERD's.
- Source code/version control with Git/GitHub.
- Leveraged Razor for creating and editing MVC applications.
- Created servers and RESTful API's with MVC.Net and Web API.
- Retrieved and stored database information in Firebase and SQL.
- Used test driven development with .NET's unit testing framework.

Touring Drummer

David Cook

July 2015 - March 2017

- Toured with platinum selling recording artist / American Idol winner David Cook. Performed live on primetime network television, iconic venues throughout the country, military bases and radio shows.

Percussion Instructor

James Bowie High School - Austin, TX

July 2010 - June 2015

- Taught the percussion program at one of the most elite marching band programs in the country. Took on teaching a section within the program and turned it into one of the strongest performing ensembles. The band placed 6th in a nationwide contest among nearly one hundred schools. Worked as a private lesson teacher year round.

public class Projects

Get Git - Front End Capstone

[adamreidelbach.github.io/
Capstone-Front-End/](https://adamreidelbach.github.io/Capstone-Front-End/)

- Get Git is an application built to help new developers effectively and efficiently learn git. The user is guided through and then quizzed on several common scenarios that are highly applicable to working as a developer. It is built with AngularJS, JavaScript, JQuery, Materialize and Angular-Materialize.

Podcast Finder

[adamreidelbach.github.io/
podcastFinder/](https://adamreidelbach.github.io/podcastFinder/)

- Podcast Finder is an application to search for podcasts using the Otto Radio API. It is built using Bootstrap, JavaScript, Browserify and Sass.

Bangazon API

[github.com/adamreidelbach/
BangazonAPI](https://github.com/adamreidelbach/BangazonAPI)

- API built for fictitious company called Bangazon. Worked in a team environment with Agile practices. User is able to Get, Post, Put and Delete. Built with C#, .NET Core, and Entity Framework.
